# EQUIPMENT SERVICE AND INSTALLATION

Since 1989, Digitrol has specialized in the heating, ventilation and air conditioning industry. Our team provides 24-hour service to commercial and industrial companies.

Our certified technicians have received factory training from:

- ◆ Carrier
- ◆ Trane
- ◆ York
- ◆ Nidec (formerly Emerson)
- ◆ Arctic Cool
- ◆ Danfoss TurboCor
- ◆ Others

If you're looking for a full service provider to design, install, maintain or replace your HVAC equipment, our team is ready to respond to your individual needs in any of the following areas.

- ◆ Duct Design and Fabrication
- ◆ Building Automation Systems
- ◆ Gas Packs
- ◆ Heat Pumps
- ◆ Maintenance Agreements
- ◆ Air Balance
- ◆ Chillers
- ◆ Cooling Towers
- ◆ Pumps
- ◆ Air Handlers
- ◆ VFD's
- ◆ Mechanical Piping
- ◆ Variable Refrigerant Flow

## EQUIPMENT SERVICES

Our factory trained and certified technicians can perform routine preventative maintenance on equipment including Rooftop Package Units, Chillers in Central Energy Plants, Cooling Towers, Pumps, and Fans.

We are available 24 hours a day, seven days a week for equipment failures. We service all types of customers including **Critical Facilities** such as:

- **Healthcare**
- **Data Centers**
- **Industrial Manufacturing**
- **Commercial**
- **Institutional**

Call us at 704-853-3114 for your emergency service needs.

## INSTALLATION SERVICES

We can install all types of equipment and systems including chilled water, hot water, DX, VRF, heat pumps, water filtration, and more.

We will manage the project till its satisfactory completion.

## BUILDING AUTOMATION SYSTEMS

Our controls division is available to program, service and install a complete Building Automation System for your energy management needs. We service existing Teletrol and KMC Digital sites. We also use Tridium Niagara4 for new installations and can integrate with existing front ends utilizing common communication protocols.

All systems include custom site programming, full trending and graphics packages, scheduling, and condition alarming. Services also include new and retrofit VFD services, HMIs and standalone programmable controllers.

## DUCT DESIGN & FABRICATION

Our in house duct design and fabrication capabilities provides a single source of responsibility for your projects. We also offer fabric and spiral duct solutions to meet your application needs.
